OSRTI Management and Analytical Support SMALL BUSINESS CONTRACT EP-W-13-016

TITLE: Green Remediation Support

TO Number: 011

TASK ORDER STATEMENT OF WORK

BACKGROUND

The mission of EPA is to protect human health and the environment. OSWER is an Agency component that is responsible for programs articulated under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA, or Superfund) of 1980, as amended by the Superfund Amendments and Reauthorization Act (SARA) of 1986; the Resource Conservation and Recovery Act (RCRA) and amendments; and other legislation and Agency directives related to the characterization, remediation, and monitoring of solid and hazardous wastes. OSWER provides policy, guidance and direction for the Agency's emergency response and waste programs. It develops guidelines for the land disposal of hazardous waste and underground storage tanks. It provides technical assistance to all levels of government to establish safe practices in waste management. It administers the Brownfields program, which supports state and local governments in redeveloping and reusing potentially contaminated sites. It also manages the Superfund program, which responds to abandoned and active hazardous waste sites and accidental oil and chemical releases. Finally, it encourages innovative technologies to address contaminated soil and groundwater.

The mission of the Office of Superfund Remediation and Technology Innovation (OSRTI) is to return contaminated areas of land associated with Superfund sites to communities for safe reuse in a healthy environment. The purpose of the OSRTI Management and Analytical Support Contract is to provide support primarily to the OSRTI program in the planning, management and oversight of the program authorized under CERCLA and SARA. The contractor will provide support to the three OSRTI divisions: the Technology Innovation and Field Services Division (TIFSD), the Assessment and Remediation Division (ARD), and the Resource Management Division (RMD).

OSRTI requires contractor assistance with planning, management, and oversight. Contract services are anticipated in the following areas: strategic planning and analysis; performance and reporting requirements; regulatory and legislative analysis; support and development of guidance documents; training, conference, and meeting support; technical analysis and research and technical information transfer and coordination; resources management and information management analysis and support; and communications, including community/public outreach and environmental justice activities analysis.

SCOPE OF WORK

The scope of this Task Order is to provide analytical, technical, and logistical support on EPA's efforts to advance the state of practice of green remediation. Contract support will be used to assist in developing and updating green remediation "best management practices fact sheets," project profiles and case histories, and other documents, reports, presentations, posters, and related items. This task order will also support the development of the draft ASTM "Standard Guide for Greener Cleanups," efforts of the Superfund Green Remediation Workgroup, an update of estimates of the extent of the market for remediation services, maintenance of a web presence for green remediation information, and research for use in preparing responses to technical and general inquiries on green remediation.

Work to be performed under this Task Order aligns with the following Task Areas of the contract Statement of Work:

- Task 1. Supporting Strategic Program Planning, Analysis, and Reporting
- Task 2. Conducting Policy, Regulatory, and Legislative Analysis and Developing Guidance Documents
- Task 3. Conducting Technical Research and Supporting Transfer of Technical Information
- Task 6. Providing Support for Training, Conferences, and Meetings
- Task 7. Maintaining the Clu-In System and Related Technical Content on EPA Websites

PERIOD OF PERFORMANCE

The period of performance for the Base Period shall be date of award through September 30, 2014.

EPA Expected LOE: 1,600 hours

TASKS

TASK 1. Technical Transfer

In this task, the Contractor shall support EPA in the production of green remediation-related reports, fact sheets, and other materials. Specific subtasks are enumerated below.

<u>Subtask 1.1 – Green Remediation Fact Sheets</u>

The contractor shall assist in developing and updating green remediation "best management practices fact sheets." Under a previous contract (EP-W-07-037, Work Assignment 32), 13 fact sheets were developed on various topics, including site investigation, pump and treat technologies, and renewable energy in site cleanups. In this subtask, the contractor shall update the completed fact sheets as needed and develop additional fact sheets as directed by technical directive.

Subtask 1.2 - Green Remediation Site Profiles and Case Histories

The contractor shall assist in developing and updating profiles and case studies on cleanup projects that include green remediation practices. Under a previous contract (EP-W-07-037, Work Assignment 32), more than 30 profiles were developed on various topics. In this subtask, the contractor shall update the completed profiles as needed and develop additional fact sheets as directed by technical directive. The updates may include changes in project status, summaries of green remediation achievements, and additional BMPs applied at a project.

<u>Subtask 1.3 – Presentations and Posters</u>

The contractor shall assist in developing and updating presentations, posters, and technical papers for various venues addressing green remediation, such as NARPM, OSC Readiness Training, FRTR, and other related government or industry conferences addressing green remediation, such as Battelle and AquaConSoil. The technical papers are short documents, up to 10 pages in length, summarizing the state of the practice in green remediation, including for example, information extracted from Subtask 1.2.

Subtask 1.4 - Conferences, Training, and Outreach

The contractor shall assist in researching, developing, and updating training material for use at conferences, and other venues addressing green remediation issues. The material will generally have a didactic function and may require adapting technical information from sources such as case studies and building them into slides or student guides that summarize or communicate the points of the course syllabus identified by the EPA.

Subtask 1.5 - Voluntary Industry Standards

The contractor shall assist EPA in its efforts to participate in the development of voluntary industry standards and guides. Under a previous contract (EP-W-07-037, Work Assignment 32), the contractor assisted EPA in its participation as part of an ASTM committee developing a standard guide for green remediation. Contractor is not expected to draft the guide, but to assist the Agency in tracking input, preparing outreach materials, and documenting pilot applications by third parties.

Subtask 1.6. – Contract Toolkit

The purpose of this task is to update and maintain the *Greener Cleanups Contracting and Administrative Toolkit*, which was developed under the previous contract. This toolkit has proven to be useful to EPA personnel seeking to integrate green remediation concerns into contracting language. The toolkit is currently available but may require updates on Agency use of green remediation language, such as including language on the use of the ASTM standard guide in grants and contracts, new requirements regarding reporting of footprint reductions, and examples of language used by third parties.

Subtask 1.7. - Superfund Green Remediation Workgroup Support

The purpose of this task is to support the Superfund Green Remediation Workgroup, including meeting support and follow up actions. The Superfund Green Remediation Workgroup consists mostly of regional Green Remediation Coordinators and Headquarters program office leads.

Delivery Assumptions: The contractor should assume 13 fact sheet updates, 2 new fact sheets, 10 site profiles or case histories, 3 posters, support for 3 conferences or training events, 1 ASTM drafts, 1 update of the contracting toolkit, and five miscellaneous related deliverables.

For estimation purposes, the contractor should assume travel as follows: 6 local person-trips within the Washington, DC area from Contractor's location to Chrystal City, Virginia; 2 person trips of two days each to the West coast and 2 two-day person-tips to the middle of the country.

DELIVERABLE	DUE DATE				
Fact Sheets	Per Technical Directive				
Profiles and Case Histories	Per Technical Directive				
Presentations and Posters	Per Technical Directive				
Conferences, Training, and Outreach	Per Technical Directive				
Voluntary Industry Standards	November 30, 2013				
Contract Toolkit	March 30 2014				
Workgroup Support	Monthly				

TASK 2. Green Remediation Web Site

The contractor will assist OSWER in maintaining a web presence for green remediation information. This task primarily entails the Green Remediation area on the Hazardous Waste Clean-Up Information (CLU-IN) web site (http://www.cluin.org/grcenremediation) and three other EPA web sites, and includes the following activities:

- X Monthly review and edit of information on the GR Focus website to delete items that are no longer relevant, add new material as information becomes available, revise material, and delete inappropriate material. This effort does not include systems work, which is undertaken under another work assignment.
- X Periodic review and design change for the GR Focus website.
- X Development and posting of specific timely items for the GR Focus website as requested by EPA.
- X Periodic review and design change for the Superfund & Green Remediation website.
- X Development and posting of specific timely items as requested by EPA for the Superfund & Green Remediation website.
- X Periodic review and design change for the OSWER Greener Cleanups web site.
- X Development and posting of specific timely items as requested by EPA for the OSWER *Greener Cleanups* web site.

DELIVERABLE	DUE DATE
GR Focus Monthly update	First of month
Periodic review and design change for the GR Focus website.	Annual
Development and posting of specific timely items for the GR Focus	Per technical Direction
GR Focus RSS Feed update	First of month
GR Focus RSS Feed, special postings/updates	TBD
Superfund & Green Remediation website postings and updates	TBD
Greener Cleanups web site postings and updates	TBD

TASK 3 Site Specific Information Support

The purpose of this task is to provide site-specific technical support to decision makers seeking to implement green remediation best practices at their sites. This support will focus on providing project managers with recommended footprint reduction options applicable at their sites. Compiling these options may require a review of case studies, internet sources and library research. This work will not require EMS to do field work, though site visits may be necessary.

DELIVERABLE	DUE DATE
Memorandum report or email	TBD

POINT OF CONTACT

WAM: Carlos S Pachon (pachon.earlos@epa.gov) Alt. WAM: Michael Adam (Adam.miehael@epa.gov)

TERMS AND CONDITIONS

Quality Assurance Project Plan

The Contractor shall prepare a Quality Assurance Project Plan (QAPP) for the accomplishment of this Task Order. In accordance with EPA's Quality System, the plan will also define and assign quality assurance (QA) and quality control (QC) responsibilities and describe the QA/QC processes and procedures to be implemented for all Tasks. A draft of Contractor's QAPP shall be submitted to and approved by EPA prior to commencing Tasks under this Task Order.

OSRTI Management and Analytical Support SMALL BUSINESS CONTRACT EP-W-13-016

TITLE: Green Remediation Support

TASK ORDER Number: 011 Amendment 3 (Extension of Period of Performance)

TASK ORDER STATEMENT OF WORK

DATE: July 7, 2016

BACKGROUND

The mission of EPA is to protect human health and the environment. OSWER is an Agency component that is responsible for programs articulated under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA, or Superfund) of 1980, as amended by the Superfund Amendments and Reauthorization Act (SARA) of 1986; the Resource Conservation and Recovery Act (RCRA) and amendments; and other legislation and Agency directives related to the characterization, remediation, and monitoring of solid and hazardous wastes. OSWER provides policy, guidance and direction for the Agency's emergency response and waste programs. It develops guidelines for the land disposal of hazardous waste and underground storage tanks. It provides technical assistance to all levels of government to establish safe practices in waste management. It administers the Brownfields program, which supports state and local governments in redeveloping and reusing potentially contaminated sites. It also manages the Superfund program, which responds to abandoned and active hazardous waste sites and accidental oil and chemical releases. Finally, it encourages innovative technologies to address contaminated soil and groundwater.

The mission of the Office of Superfund Remediation and Technology Innovation (OSRTI) is to return contaminated areas of land associated with Superfund sites to communities for safe reuse in a healthy environment. The purpose of the OSRTI Management and Analytical Support Contract is to provide support primarily to the OSRTI program in the planning, management and oversight of the program authorized under CERCLA and SARA. The contractor will provide support to the three OSRTI divisions: the Technology Innovation and Field Services Division (TIFSD), the Assessment and Remediation Division (ARD), and the Resource Management Division (RMD).

OSRTI requires contractor assistance with planning, management, and oversight. Contract services are anticipated in the following areas: strategic planning and analysis; performance and reporting requirements; regulatory and legislative analysis; support and development of guidance documents; training, conference, and meeting support; technical analysis and research and technical information transfer and coordination; resources management and information management analysis and support; and communications, including community/public outreach and environmental justice activities analysis.

SCOPE OF WORK

The scope of this Task Order is to provide analytical, technical, and logistical support on EPA's efforts to advance the state of practice of green remediation. Contract support will be used to assist in developing and updating green remediation "best management practices fact sheets," project profiles and case histories, and other documents, reports, presentations, posters, and related items. This task order will also advance the implementation of greener cleanups through a wider use of the ASTM "Standard Guide for Greener Cleanups", support of the Superfund Green Remediation Workgroup, maintenance of a web presence for information on greener cleanups, and research for use in preparing responses to technical and general inquiries on green remediation.

Work to be performed under this Task Order aligns with the following Task Areas of the contract Statement of Work:

- Task 1. Supporting Strategic Program Planning, Analysis, and Reporting
- Task 2. Conducting Policy, Regulatory, and Legislative Analysis and Developing Guidance Documents
- Task 3. Conducting Technical Research and Supporting Transfer of Technical Information
- Task 6. Providing Support for Training, Conferences, and Meetings
- Task 7. Maintaining the Clu-In System and Related Technical Content on EPA Websites

PERIOD OF PERFORMANCE

The period of performance for the Base Period shall be date of award through September 1, 2017.

The contractor shall provide a technical and cost proposal for the period of performance from September 1, 2016 through September 1, 2017. The contractor shall de-scope any un-utilized capacity from the current Period of Performance ending September 30, 2016. The contractor's revised total cost estimate shall only reflect the work which was completed from the original Period of Performance (PoP) and the work that is expected to be completed through September 1, 2017.

TASKS

TASK 1. Technical Transfer

In this task, the Contractor shall support EPA in the production of green remediation-related reports, fact sheets, and other materials. Specific subtasks are enumerated below.

Subtask 1.1 – Green Remediation Fact Sheets

The contractor shall assist in developing and updating green remediation "best management practices fact sheets." Under a previous contract (EP-W-07-037, Work Assignment 32), 13 fact sheets were developed on various topics, including site investigation, pump and treat technologies, and renewable energy in site cleanups. In this subtask, the contractor shall complete the fact sheet updates initiated in the second PoP on this Contract.

Subtask 1.2 – Green Remediation Site Profiles and Case Histories

The contractor shall assist in developing and updating profiles and case studies on cleanup projects that include green remediation practices. Contractor shall implement updates to 5 profiles based on data collected in the second PoP. The updates may include changes in project status, summaries of green remediation achievements, and additional BMPs applied at a project.

Subtask 1.3 – Presentations and Posters

The contractor shall assist in developing and updating presentations, posters, and technical papers for various venues addressing green remediation, such as Brownfields 2017, and other related government or industry conferences addressing green remediation, such as Battelle and AquaConSoil. The technical papers are short documents, up to 10 pages in length, summarizing the state of the practice in green remediation, including for example, information extracted from Subtask 1.2. One poster and one paper are anticipated in this PoP.

Subtask 1.4 - Conferences, Training, and Outreach

The contractor shall assist in researching, developing, and updating training material for use at conferences, and other venues addressing green remediation issues. The material will generally be a presentation and mini case-study have a didactic function and may require adapting technical information

from sources such as case studies and building them into slides or student guides that summarize or communicate the points of the course syllabus identified by the EPA. EPA anticipates requiring support for two events under this PoP.

Subtask 1.5 – Voluntary Industry Standards

The contractor shall assist EPA in its efforts to increase awareness and use of the ASTM Standard Guide for Greener Cleanups. Contractor shall assist the Agency in tracking input, preparing outreach materials, and documenting pilot applications by EPA and third parties. EPA anticipated developing outreach documents for 5 pilot case studies.

Subtask 1.6. – Contract Toolkit

The purpose of this task is to maintain the *Greener Cleanups Contracting and Administrative Toolkit*, which was developed under the previous contract and updated under this Contract in the previous PoP. This toolkit has proven to be useful to EPA personnel seeking to integrate green remediation concerns into contracting language. The toolkit is currently available but may require updates on Agency green remediation language, such as language on the use of the ASTM standard guide in grants and contracts, new requirements regarding reporting of footprint reductions, and examples of language used by third parties.

Subtask 1.7. - Superfund Green Remediation Workgroup Support

The purpose of this task is to support the Superfund Green Remediation Workgroup, including meeting support and follow up actions. The Superfund Green Remediation Workgroup consists mostly of regional Green Remediation Coordinators and Headquarters program office leads, meeting monthly by conference call.

Delivery Assumptions: The contractor should assume 4 fact sheet updates, 10 site profiles or case histories, 3 posters, support for 3 conferences or training events, and five miscellaneous related deliverables.

For estimation purposes, the contractor should assume travel as follows: 3 local person-trips within the Washington, DC area from Contractor's location to Chrystal City, Virginia; 1 person trips of two days each to the West coast and 1 two-day person-tips to the middle of the country.

DELIVERABLE	DUE DATE
Fact Sheets	Per Technical Directive
Profiles and Case Histories	Per Technical Directive
Presentations and Posters	Per Technical Directive
Conferences, Training, and Outreach	Per Technical Directive
Workgroup Support	Monthly

TASK 2. Green Remediation Web Sites

The contractor will assist OSWER in maintaining a web presence for greener cleanups. This task primarily entails the Green Remediation area on the Hazardous Waste Clean-Up Information (CLU-IN) web site (http://www.cluin.org/greenremediation) and three other EPA web sites, and includes the following activities:

- 1. Monthly review and edit of information on the GR Focus website to delete items that are no longer relevant, add new material as information becomes available, revise material, and delete inappropriate material. This effort does not include systems work, which is undertaken under another work assignment.
- 2. Periodic review and design change for the GR Focus website.
- 3. Development and posting of specific timely items for the GR Focus website as requested by EPA.
- 4. Periodic review and posting of specific timely items as requested by EPA for the *Superfund & Green Remediation* website¹.
- 5. Periodic review and design change for the EPA *Greener Cleanups* Resource Directory².
- 6. Development and posting of specific timely items as requested by EPA for the OSWER *Greener Cleanups* web site.
- 7. Periodic review and design change for the Superfund Climate Change Adaptation topic area³.

DELIVERABLE	DUE DATE		
GR Focus Monthly update	First of month		
Periodic review and design change for the GR Focus website.	Annual		
Development and posting of specific timely items for the GR	Per technical Direction		
Focus			
GR Focus RSS Feed update	First of month		
Superfund & Green Remediation website postings and updates	First of month		
Greener Cleanups web site postings and updates	Per technical direction		

TASK 3 Site Specific Information Support

The purpose of this task is to provide site-specific technical support to decision makers seeking to implement green remediation best practices at their sites. This support will focus on providing project managers with recommended footprint reduction options applicable at their sites. Compiling these options may require a review of case studies, internet sources and library research. This work will not require EMS to do field work, though site visits may be necessary.

DELIVERABLE	DUE DATE
Memorandum report or email	30 Business days after request

TASK 4. Climate Change Adaptation and Green Remediation Support for EPA Region 10.

In this task, the Contractor shall support EPA in the identification and evaluation of a range of alternatives to effectively manage stormwater runoff within a remediated Superfund cleanup area in its Kellogg, Idaho.

¹ https://www.epa.gov/superfund/superfund-green-remediation

² https://www.epa.gov/greenercleanups

³ https://www.epa.gov/superfund/superfund-climate-change-adaptation

The contractor shall assist in documenting a full range of appropriate green infrastructure techniques, as alternatives or supplements to "gray infrastructure" design options. The analysis will also evaluate anticipated climate related changes to rain and snow fall in the area (using information sources identified through earlier CCA work under this TO, and others as identified). This objective will be accomplished by thoroughly characterizing and understanding the study area, developing a suite of alternatives, and developing screening and evaluation criteria for the alternatives (screening protocol). The result is a list of innovative and cost effective solutions to resolve the storm water management issues consistent with the existing remedy at the site. The screening protocol may be applied by a third party, beyond the scope of this Amendment, to prioritize among alternatives. Criteria may include their capacity to reduce the volume of water within the study area, and to prevent infiltration through soils that are heavily contaminated with legacy mining wastes.

For estimation purposes, the contractor should assume travel as follows: One 1-person-trip to the Northern Idaho/Coeur D'Alene area from Contractor's location. EPA does not anticipate primary data collection as part of this task, not are the products to be used as decision or design documents for site management.

DELIVERABLE	DUE DATE
Final Draft outreach tool (ppt, fact sheet, etc) to address potential	August 15, 2016
implications to the local population, existing infrastructure and other	
remediation projects in proximity to or within the drainage area.	
Final Draft Analysis of storm water management solutions leveraging	September 30, 2016
natural drainage systems	775
Final products (Analysis and outreach tool)	Two weeks after receipt
	of EPA comments

Alt. WAM: Michael Adam (<u>Adam.michael@epa.gov</u>)

TERMS AND CONDITIONS

Quality Assurance Project Plan

The Contractor shall prepare a Quality Assurance Project Plan (QAPP) for the accomplishment of this Task Order. In accordance with EPA's Quality System, the plan will also define and assign quality assurance (QA) and quality control (QC) responsibilities and describe the QA/QC processes and procedures to be implemented for all Tasks. A draft of Contractor's QAPP shall be submitted to and approved by EPA prior to commencing Tasks under this Task Order.
